Standard:  
storm  
buckles  
& straps

Sometimes the simple things in life are all that is required. This applies to our StarCamp brand, perfectly. As part of Dorema, StarCamp awnings are the ideal entry level awnings that combine value with quality.

### 'Which porch awning will fit my caravan/motorhome?'

This is a common question that we are regularly asked. Our porch awnings are designed to fit along the straight top horizontal section of the awning rail on your caravan (**measurement A**). Motorhome owners will need to measure the awning rail system fitted to their vehicle to determine measurement A. Please note that we provide 'Tunnel Beading Length' measurements with all Starcamp motorhome awnings. The measurement from the ground to the awning rail, at the top of your caravan or motorhome, should be 235cm to 250cm (measurement B). For motorhomes we provide various range of heights which determine the tunnel size required.

We provide the floor size measurement and the roof width measurement for all of our porch awnings. These measurements will determine whether the sides of the porch awning are sloping or 90 degrees vertical. There are other factors which you may want to consider, for example, the location of vents, lockers, windows, etc. With this information you will be able to make the right choice on the porch awning that best suits your requirements.
